MAIN STREET

During the week of August 15th, crews will continue excavating trenches for underground utilities. They will also be prepping for curb installation from the Concord Food Co-op toward Concord Street and in the medians. Work is scheduled to be done on Azniv Alley on Monday, and Fayette Street will be closed on Tuesday due to continuing work in that area. Work on Pleasant Street near Pitchfork Records will continue in preparation for new curbing.

Paving is scheduled to take place on Friday, August 19th, in the area of the Concord Food Co-op curbing, and in the curbing areas from the north end of the work zone south to the Co-op's exit. As always, the construction schedule is weather dependent and subject to change.

KIMBALL POOL RECONSTRUCTION

Concord General Services is pleased to announce the upcoming renovation of the pool at Kimball Park. The completion of this project, which fully replaces the existing pool structure, will offer full ADA accessibility, including "zero-entry" access to the pool; improved deck floor traction and drainage to reduce slips, trips and falls; and exciting new features like a beach style ramp and gusher jets. In addition, the visual appeal of the facility will be improved with new lavatory fixtures, signs, and fresh paint. Finally, we will see improved energy efficiency with new lighting and water filtration media.

This project will begin next week and continue through next spring. There will be heavy, noisy equipment involved in the initial demolition phase of the project, which should take about two weeks. This work will be completed during weekday, business hours, and will be completed as quickly as possible. There may also be some noise associated with the work continuing into the late summer, but it will also be limited to weekday business hours. We appreciate the neighborhood's patience as we embark on this exciting project to enhance and improve this important community asset.

LIVE MUSIC ON THE LAWN

On Wednesday, August 17th, at 6:00 PM, the Concord Public Library will offer its last "Live Music on the Lawn" concert of the season. "Feisty Pants", the dynamic duo of John Burlock and Rachel Vogelzang Burlock, will bring its contemporary singer-song writer stylings to the stage. Known for its lively performances, "Feisty Pants" combines one guitar, one piano, and two voices in harmony to shape their distinctive sound. Bring a chair or blanket and come enjoy the festive block party atmosphere on Prince Street.

WATER CONSERVATION ADVISORY

Due to the current drought conditions, Concord General Services advises Concord citizens to conserve water. Although Concord's water supply is sufficient to meet current demands, and an emergency supply is available if necessary, Concord water consumers should still use water wisely during this period. Even with some recent rain, the state is experiencing severe conditions. Visit www.concordnh.gov/conservation for water conservation tips that can help reduce water consumption or visit www.concordnh.gov/irrigation to learn about proper irrigation techniques.

Current lower water production levels from our Water Treatment Plant suggest that Concord residents have decreased their water use in response to the recent drought. We appreciate all efforts to continue to use water wisely to preserve our community's water resource. For statewide drought updates, visit the [NH Department of Environmental Services website](http://NHDepartmentofEnvironmentalServices.com).
